Kulkarni Atharva

has successfully completed the online Professional Certificate

IBM Ethical Hacking with Open Source Tools

Holders of this Professional Certificate are conversant with ethical hacking methodologies and industry-standard open-source tools, such as Kali Linux, Wireshark, Metasploit, and OpenVAS. Through hands-on labs and practical projects, they have effectively practiced applying these tools in penetration testing, network analysis, and vulnerability assessment. These professionals understand the ethical and legal frameworks governing cybersecurity practices and can effectively identify security vulnerabilities while adhering to responsible disclosure procedures. They are equipped to perform network traffic analysis, execute controlled exploits, and implement incident response strategies.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
